

## Horizontal Press

The PBH-10 Standard and NC Horizontal Hydraulic Press Machine 10 Ton models are extremely versatile and is ideal for precision bending, straightening, punching, and shearing making it possible to produce a vast assortment of different parts such as braces, hooks, rings, brackets, clips from heavy-duty metal.

The different tools available for Horizontal press brakes are countless but some of the most common tools are for metal folding, bending, punching, crimping, cutting and other tools for bending tube, pipe and metal profiles are also available. Some optional tools are portrayed underneath the machine.

### Features

- Control for stroke length
- Press flow control valve
- Pressure manometer
- Angular graduations on table
- Back gauge
- Pin holes for various tools

## HPB-10 Series Standard / NC

### Technical Specifications

Force (tons)	10
Oil Tank Capacity (litres)	12
Bending Capacity Flat (mm)	185
Bending Capacity Tubes (mm)	42 x 3.2
Stroke (mm)	185
Height of Tooling (mm)	150
Working speed (mm/sec)	10
Return Speed (mm/sec)	10
Motor (kW)	1.1
Weight (Kg)	250
Table Size (LxW)	450 x 900
Working Height (mm)	915
Size Length (mm)	900
Size Width (mm)	450
Size Height (mm)	1130
Packaging (cm)	100 x 50 x 150

### Optional Accessories

- Flat Bar Bending
- Round Tube and Pipe Bending
- Punches and dies for holes
- Cutting and Cropping
- Various V-Dies and V-Blocks

CNC Controller

Standard Controller
