

Bandsaw

The SN 420 Manual bandsaw has a base in cast iron with ample circular support plate which turns with the large bow. The large diameter of the turntable offers both a very wide working surface and precision in cutting perpendicular position. The turntable supporting bow rotates on a ball track guaranteeing easy adjustment to different cutting angles. The bow can be adjusted for 90° cuts or using the adjustable mechanic stops for 45° right or 60° left cuts.

- Blade supported by two blade guides
- Adjustable roller bearings
- Adjustable machine parts
- Bar stop with millimetric bar
- Bow inclination, blade length and the band wheel diameter are designed to minimise blade fatigue, increasing its duration
